

Supplementary Figure 4. Pharmacologic inhibition of S1PR2 by JTE-013 alleviates the severity of liver injury in DDC-induced liver fibrosis mice. Serum levels of alanine aminotransferase (ALT, A) and aspartate aminotransferase (AST, B). Hepatic CCL2 (C) mRNA levels on RT-PCR. S1PR2, sphingosine 1-phosphate receptor 2; DDC, 3,5-diethoxycarbonyl-1,4-dihydrocollidine. *** $P < 0.005$ compared with the control group. # $P < 0.05$ compared with the DDC model group.
