
Supplementary Figure 1. Detailed description of the HCC development process based on the HTVi system. (A) Liver images of the HTVi mice model at different weeks. Statistical data including maximum tumor diameter (B), tumor number (C), body weight (D) and liver-to-body weight ratio (E) at various time points of the process. (F) H&E images of the HTVi mice model at different weeks. Scale bar: 2,000 μm.
